

Day 1 – Introduction & Orientation

Work Done / Learning:

The first day began with an introduction to Oops InfoSolution Pvt. Ltd., its organizational structure, and work ethics. The training coordinator explained the objectives of the internship and gave an overview of the main project — *3D Travel Planner – Interactive Travel Planning Platform*. We learned about how the company manages real-world projects, version control, and client requirements.

Challenges Faced:

Initially, understanding the overall workflow of the project seemed complex as it involved multiple technologies like HTML, CSS, JavaScript, and Three.js.

Conclusion / Outcome:

By the end of the day, I gained a clear understanding of the training plan, goals, and expectations, and felt motivated to begin the technical work.
